

**Maverick lives with Derryn and family in Waiuku.**

Hi Janne, I was lying in bed this morning thinking I should send you some photos of my little man Maverick. He sleeps happily beside me every night once he has settled down from his evening antics!

The whole family is so in love with him, he is such a little character, full of beans, and forever entertaining us. He is now allowed outside whenever he wants during the day and is enjoying his huge playground, especially the cabbage trees which he loves to climb to the top of. We've decided he'll be an inside cat at night. I wouldn't sleep a wink knowing he was out in the dark (probably causing havoc)

He loves to play fetch and chases everything that moves. He chased a wasp and got a swollen eye, but I see him chasing them again!

I must say "I'm not getting much done these days always stopping for a cuddle or play whenever I pass him!"
