

Simba and Nala 8 mths

Maree Wakelin

In November 2016 we purchased 2 of Janne's Bengal kittens, a brother and sister, Simba and Nala. After choosing our babies Janne kept us informed with regards to their progress and sent us regular photos which we really looked forward to. We could hardly wait to pick them up and bring them home.

They settled in well in our rural home and quickly became besties with Wesley our pug dog. They are the best cats I've ever owned, although they are slightly different from other cats, once you have earned their trust they love you immensely. They sleep on our bed every night and are so entertaining. They love water, are expert tree climbers and often sit on the top of doors. I highly recommend Spotcombengal kittens. They are well socialized, beautiful, happy and healthy. Maree Wakelin. Simba and Nala live with Maree and family in the country. She writes that they are ferocious hunters, always catching Rats, mice, frogs and baby rabbits. She found a dead rat offering on her pillow recently so they are locked in at night now.
